

VIRTUAL GREEN

BY FULL SWING

GARY WOODLAND

“ Seeing the lines and the way the ball moves, I can get that
done now, more quality over quantity and I’m getting better
for that. ”

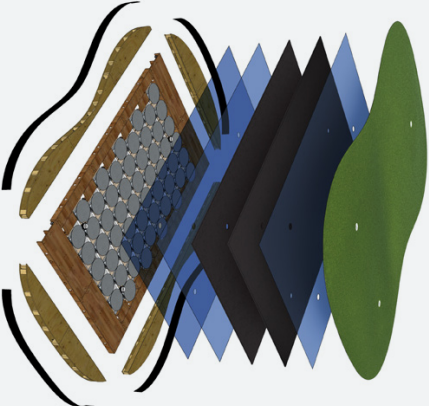

EVERY KIND OF PUTT ON ONE GREEN

The Virtual Green floor uses patented technology to change slope and undulation to mimic any putting contour in golf.

THE SCIENCE BEHIND A TRUE GREEN EXPERIENCE.

Multi-layer construction provides strength, stability and the most realistic putting experience possible.

Computer controlled actuators raise and lower simultaneously to create a multitude of putting scenarios.

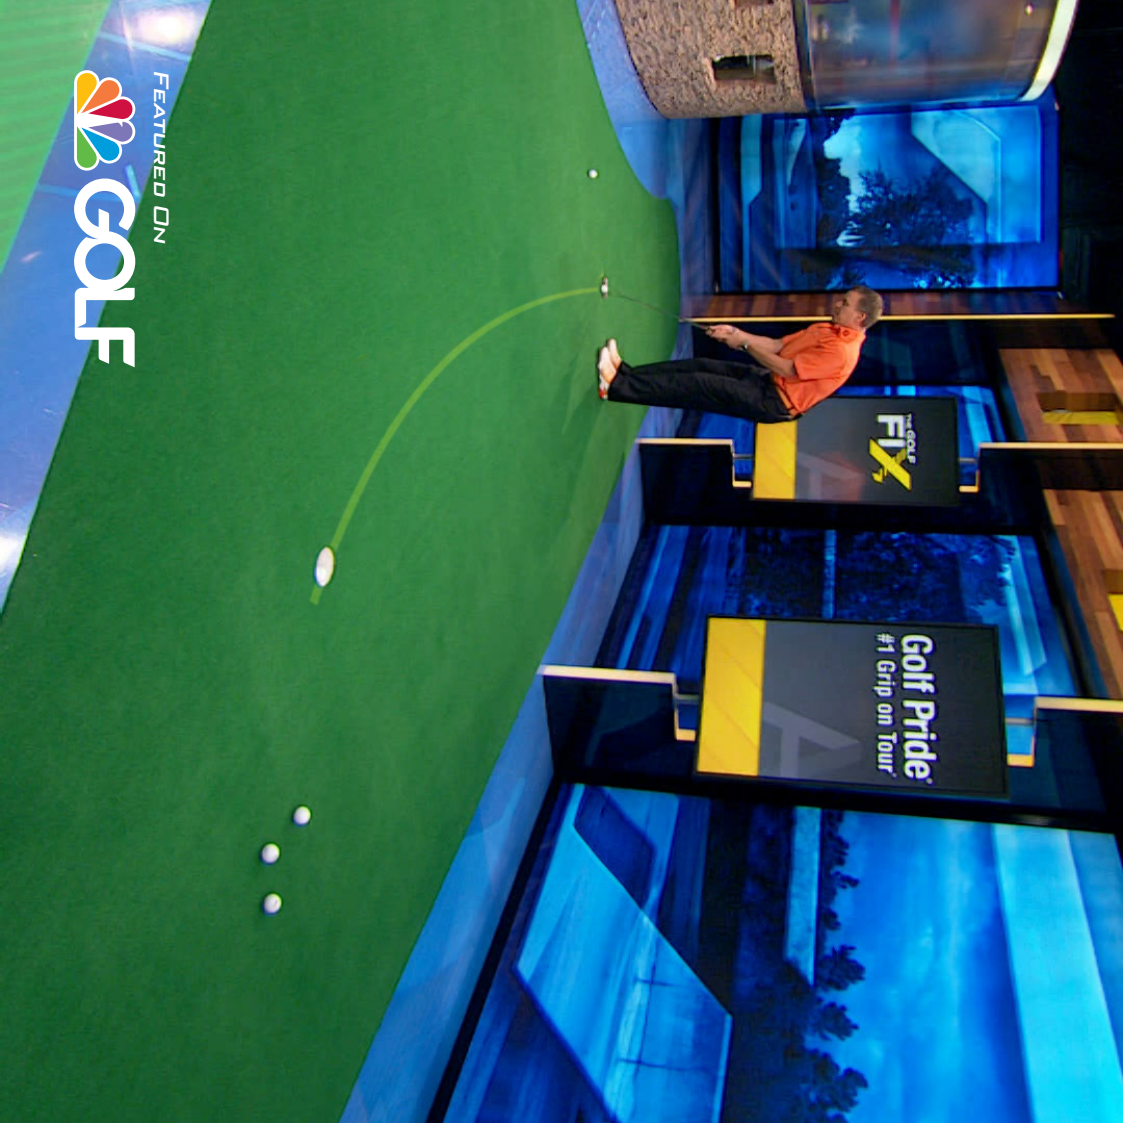

Control the contour of the green on an easy to use HD touchscreen.

JASON DAY

"That's why I come in here and work on the Virtual Green. It can almost get any putt that you want out there, but inside."
